Riverland Farmers' Market

The Riverland Farmers' Market was set up in 2006 and is the flagship of Food Riverland. The market provides local growers with a place to sell their produce direct to the public and near their source of origin creating benefits to them, the environment and the local community.

The Riverland Farmers' Market sets itself apart from many other markets across Australia in that it offers the public an indoor/outdoor experience. The convenience allows us to provide locals and visitors with somewhere to shop and a place to meet for breakfast with friends and family while enjoying a vibrant atmosphere all year round.
